

Important care information for masks

General information:

- for private use only
- wash before first use
- ensure mask is placed correctly over nose and mouth - the edges should have a snug fit
- wash hands thoroughly with soap before putting on and after removing or touching the mask
- masks should be changed as soon as they start to become wet
- used masks should be kept in an airtight bag or washed

immediately

- not suitable for medical use
- not suitable for use as PPE
- not for use in health or care, as occupational safety or other protective equipment to protect against infections or pollutants, such as fine particulate matter
- not proven to provide effective protection

Care instructions:

before washing, pull the rubber bands into the seam so they are no longer visible.

we recommend washing in a laundry bag.

Material:

external: 220g/m² polyester fabric (100% polyester)

internal: internal material (antibacterial): 125g/m² cotton (100% cotton)
